- Source Code - <https://github.com/sandhiyasampath>

# PROJECT

---

## 1. Project Management Tool :Used tech stack

1. Programing Language - Python
  2. Framework - Django
  3. Database - MySQL
- Using Project Management Tool application should be able to do the following
    1. Ability to store Employee details with all the projects that the Employee is a part of.
    2. CRUD operations can be done through the django admin.
    3. Front end having a drop down listing all the Employees,when Employee is selected it will show all the Employee details and projects of the Employee.
    4. Instead of a drop down on the front end you can search an Employee using search box(search is case insensitive).
  - Source code - <https://github.com/sandhiyasampath/projectmanagementtool>

## 2.Task Manager - Reminder Application

- **Used tech stack**
  1. Programing Language - java
  2. java development tool - Eclipse IDE
- Using Task Manager application should be able to do the following
  1. Console based Application
  2. Ability to create,load,update,delete,search Category and Task
